Human MTC™ Panel I

 Catalog No.
 Amount
 Lot

 636742
 10 rxns
 Number

 2302297A

Description

Panel of normalized, first strand cDNA preparations from RNA from the tissues/cells listed on the back of this page. The cDNAs included in the MTC Panels can be used as templates for PCR using gene-specific primers to study tissue expression patterns. Each cDNA preparation is sufficient for 10 PCR amplifications. G3PDH PCR Primers and Control cDNA are included for 10 positive control reactions.

Package Contents

- 50 µl First-strand cDNA from each of the tissues/cells specified on the back of this page.
- 50 µl Human Control cDNA
- 40 μl G3PDH Control 5' & 3' PCR Primers (10 μM each)

Storage Conditions

• Store at -20°C.

Expiration Date

• MAR. 21, 2025

RNA Type

Poly A⁺ RNA

RNA Source

 The age and sex of tissue/cell donors are specified on the next page. All tissue sources, as far as can be determined, are free from disease.

Number of Samples

• 8

Concentration

~1.0 ng/µl

Normalization

The following sequences were used to normalize the concentration of the cDNA samples:

- phospholipase A2
- G3PDH
- beta-actin
- alpha-tubulin

Human MTCTM Panel I

Shipping Conditions

• Dry ice

Product Documents

Documents for our products are available for download at <u>takarabio.com/manuals</u> The following documents apply to this product:

• cDNA Panels User Manual

Tissue or Cell Line Sources

Tissue/Cell Line	Source
Heart	Normal human heart(whole) pooled from 3 male Caucasians; age: 24-41 years; cause of
	death: sudden death.
Brain	Normal human brain(whole) pooled from 8 male Caucasians; age: 43-65 years; cause of
	death: sudden death.
Placenta	Normal human placenta pooled from 11 female Caucasians; age: 19-39 years; cause of
	death: alive.
Lung	Normal human lung pooled from 1 male Caucasian; age: 50 years; cause of death: sudden
	death.
Liver	Normal human liver(whole) pooled from 1 male Caucasian; age: 35 years; cause of death:
	sudden death.
Skeletal Muscle	Normal human skeletal muscle pooled from 4 male/female Caucasians; age: 25-56 years;
	cause of death: trauma.
Kidney	Normal human kidney pooled from 4 male/female Caucasians; age: 28-48 years; cause of
	death: sudden death.
Pancreas	Normal human pancreas pooled from 15 male/female Caucasians; age: 22-69 years; cause
	of death: sudden death.

Quality Control Data

 $5~\mu l$ of each cDNA preparation, including the Control DNA, was tested in a separate $50~\mu l$ PCR amplification using the G3PDH Control Primers. After 22 cycles, a $5~\mu l$ sample of each PCR product was run on a 1.2% agarose/EtBr gel. Each reaction produced a single band of the expected size (983 bp).

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
